

Classroom Select® Makerspace Mobile Carts

Keep Makerspace, Robotics, and STEM supplies neatly stocked, divided, and easy to access inside our Classroom Select® Makerspace Mobile Carts. From the attractive 1-7/8" finished solid wood butcher block top and adjustable interior shelves, down to the steel pegboard side panel for hanging tools and a magnetic whiteboard side for drawings, project notes, instructions, or team names, every piece of these five unique carts is multi-functional (and fun). All doors are lockable and two locking and non-locking casters make all five carts ready to roll and utilize in Grade 5 to 12 science labs, computer areas, or classrooms.

[Visit ClassroomSelect.com](https://www.classroomselect.com) for complete warranty details.

FEATURES

- Makerspace Single Cart is flexible and helps students organize their projects
- Makerspace Double Cart offers a larger capacity than the single cart in case larger trays or projects are needed for storage
- Makerspace Large Vex-like Cart adds capacity, mobility and flexibility for organization and storage and includes adjustable shelves
- 3D printer cart offers the best organization yet for your makerspace projects including adjustable enclosed shelves, filament spool storage and a side shelf that can be in-use or folded down or detached altogether
 - o The side shelf measures 18.12"W x 18.11"D
- Mobile tool storage cart is perfect for classroom use. It includes top two shelves that are pass through construction to hold large tools while the bottom two shelves offer space to store smaller tools, components, and supplies
- All cabinet doors lock for extra security
- A generous sized back panel is an entire magnetic markerboard to keep notes and drawings necessary as projects progress
- Each side of all carts are made of steel peg boards perfect to hang needed supplies and tools during project learning and collaboration
- All carts and cabinets include a large titanium color polypropylene handle for easy push or pull movement
- All carts/cabinets include two casters that are locking and two casters that are non-locking for smooth mobility and proper positioning when needed
