3-D Color-Coded Paper

written by Linda Leonard

Introduction

Who knew learning to write could be so fun? Introducing the Four Color Raised Line paper, the sensory solution for developing handwriting skills. The various color-raised lines give definite boundaries for the beginning and ending of all letters. Perfect for young minds and hands to practice letter and number formation and simple handwriting assignments or great for coloring and color recognition skills. Recommended for children ages preschool through first grade.

Product Use

Here are a few of our favorite activities:

- Have the student practice simple letter formation or writing the entire alphabet
- Use each color row to practice a row of letters: Blue for A, Red for B etc.
- Practice with tracing: Have the student use the corresponding color and practice tracing over the raised lines.
- Color between like colored lines using a pencil or crayon with the corresponding color
- Sharpen up scissor skills: Cut in between two like colored lines, or for more advanced skills, cut along a single raised colored line.

Modifications

The Four Color Raised Lined Paper makes a great adaptation for special needs children with fine motor or handwriting challenges. The perfect paper for children with CP, autism or visual impairments. Use on a clipboard or slantboard for added stability during writing activities.

Recommended Products

We recommend these other great Abilitations products:

- Abilitations Slantscript Bigboard (item# 100208): slanted surface makes writing more comfortable
- Abilitations Hi-Write Paper (item# 105743): high lighted lines help organize where to write.
- RediSpace Paper (item#109851): Helps with learning left to write, margin and spacing skills with handwriting.
